

## Special Issue

# Asymmetrical Risks and Challenges in Emerging Financial Markets and Economies – Theories, Approaches and Reforms

### Message from the Guest Editors

Understanding the current evolutions of financial markets and economies remains one of the main challenges and concerns both for academia and practitioners. The contemporary economies are facing numerous risks and challenges in their way of assuring growth and well-being for their populations. In this context, it is necessary to examine whether proxies of asymmetrical risks exposure can predict the future evolution and volatility of financial markets and economy. Managing risks has become a crucial instrument in assuring resilient development in numerous fields, starting from the company level, continuing with the financial markets, and turning into a major topic of discussions. Herein, we propose a specific framework of debating, identifying, and arguing the main streams in this research field. In this context, we will consider all types of submissions, both theoretical and practical articles, conceptual notes, and full-length articles dealing with asymmetrical risks and challenges in emerging financial markets and economies. Also, related topics are considered.

### Guest Editors

Prof. Dr. Jean-Vasile Andrei

Prof. Dr. Aleksandar Grubor

Prof. Dr. Teodor Sedlarski

Dr. Jonel Subić

### Deadline for manuscript submissions

closed (31 December 2021)

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
