

## Special Issue

# Corporate Sustainability and Firm Performance: Models, Practices and Policy Perspective

### Message from the Guest Editors

This Special Issue aims to contribute to informing action toward achieving corporate sustainability through innovative and solution-oriented research articles, review articles and case studies that elaborate on the linkages between sustainability and the firm performance for achieving business excellence. We call for original research on the crossroads of corporate social responsibility, ESG reporting, social performance, stakeholder management, innovative social models, and firm performance. We intend to provide new avenues to reflect and reimagine the challenges, opportunities, and sustainable outcomes of business practices in the light of the UNSDGs. Theoretical and empirical contributions, either qualitative or quantitative, are therefore welcome.
