

Special Issue

Sustainable Production: Finance, Technology, and Institutional Quality

Message from the Guest Editor

This Special Issue is intended to bring together papers on specialized topics of the macroeconomics of finance and their relationship to production, trade, and sustainable growth. In other words, given the post-pandemic recovery and de-globalization, it will focus on the role of FDI, foreign and domestic capital, and credit constraints in sustainable production and inclusive growth. The management of and risk involved in undertaking financial decisions for distressed firms are important issues for macroeconomic performance that also affect the firm-level or micro-level dimensions of the economy. Not only this, but aspects such as governance, ESG, CSR, and political stability matter for the volatility of investments and perceived risk factors. We invite papers focusing on the interplay of such issues. Papers focusing on such issues and related themes are encouraged to be submitted, and they will enter a quick blind peer review/refereeing process so that the publications could be enhanced on a fast-track basis.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
