

Special Issue

Budgeting in a Crises— Macroeconomy Relief Policies

Message from the Guest Editors

This Special Issue focuses on understanding the dynamics of government responses to crises, economic fallout, business cycle recessions, and shocks.

Macroeconomic responses vary depending on the nature of the shock and country circumstances. Adding up the different measures, such as tax and spending, loans and guarantees, monetary instruments, and foreign exchange operations, makes it challenging to assess the efficiency of the aggregate policy environment and crisis-contamination measures. We welcome empirical papers on the application of new types of macroeconomic models in different countries to explain economic policies in various fields:

- The impact of the COVID-19 pandemic on global economies and sector-wide performance measures.
- Business cycle stabilization policies to foster economic re-convergence.
- The scope and limits of cross-country comparisons in response to shocks and applied mitigation policies.
- The role of automatic stabilizers, fiscal stimulus, and optimal monetary policies in stabilizing economies.
- The role of behavioral nudges in the design of public policies.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief
