

Special Issue

Recent Developments in Digital Currency: Time Series Analysis, Theory and Practice

Message from the Guest Editor

The Special Issue will provide a critical analysis of existing models that make claims for the behaviour of digital currency prices. The most famous example of digital currency is Bitcoin, but there are many other examples and we welcome research on them as well. New models would also be included. Issues related to market structure, such as the introduction of digital currency by central banks and its likely impact on Bitcoin prices, will also be welcome. Whilst the main focus will be on statistical analysis, the SI will be open to research that is broadly in this area.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
