

Special Issue

Economic Policy Uncertainty in Emerging and Small Open Economies

Message from the Guest Editor

Since the 2008 financial crisis, we have experienced above-average levels of economic policy uncertainty (EPU) in markets around the world. From Brexit to the recent tariff war between China and the United States and increased political conflicts between countries around the world, we have seen how economic policy uncertainty negatively affects economic activity, international trade, and firm-level investment spending. Despite the research carried out in large and relatively closed economies such as the United States, there is still a limited body of work concerning the impact of EPU in countries with small open economies and countries with emerging economies. This Special Issue is specifically looking for empirical contributions on how EPU is associated with asset prices, investment behaviors, corporate finance, and enterprise risk management in emerging and small open economies.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief

Prof. Dr. Thanasis Stengos
