

Special Issue

Economics, Environment, and Societal Challenges

Message from the Guest Editor

Increased human activities and extreme climate events exert great stresses on ecosystems and society. Resources are essential for the sustainability of human society. The sustainable management of resources is therefore critical to address many of the societal challenges we are facing. A multidisciplinary approach, which takes account of the interactions between humans and resource use, can be a fundamental tool for developing cost-effective management strategies and public policies for social and environmental sustainability. The Special Issue will present recent advances in policy analysis, modeling, assessment, planning, and management of a decisive societal and technological transition to an economy based on a sustainable relationship between nature and human wellbeing. This Special Issue covers but is not limited to such topics as:

- Environment, health, demographic change, and wellbeing;
- Food security, sustainable agriculture, and forestry;
- Secure, clean, and efficient energy;
- Smart, green, and integrated transport;
- Climate action and resource efficiency;
- Inclusive, innovative, and reflective societies

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
