

Special Issue

Applied Public Finance and Fiscal Analysis

Message from the Guest Editors

This Special Issue of *JRFM* seeks to push the boundaries of empirical public finance by bringing together cutting-edge research that combines sophisticated econometric methods with new data sources to address fundamental questions in public finance. We are particularly interested in research that employs quantitative and qualitative methodologies, explores new data sets, and provides causal evidence on the effectiveness of fiscal policies, tax reforms, public spending programs, and institutional sustainability and efficiency. We encourage submissions that address the fundamental questions of public sector economics regarding allocation, distribution, and stabilization through the lens of modern empirical methods. We particularly welcome papers that employ novel identification strategies, exploit unique institutional features, or use innovative data sources to shed light on classic and contemporary public finance issues. We encourage findings about the effectiveness of fiscal policy, supported by solid empirical evidence and sound theoretical reasoning.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief

Prof. Dr. Thanasis Stengos
