

Special Issue

International Trade and Financial Management

Message from the Guest Editor

International trade and international financial flows such as foreign direct investment and remittances play a significant role in open economies. Such international financial flows are becoming increasingly important for developing countries given their fragile institutions and financial constraints. The situation became even more challenging in 2020 because of the pandemic. For this Special Issue of *Journal of Risk and Financial Management*, we welcome submissions on any topic related to international trade and finance. The purpose of this Special Issue is to collect high-quality recent research on different problems related to international trade and finance, including research pertaining, but not limited to, international trade flows, foreign direct investment, remittances, official development assistance or foreign aid, capital inflows and outflows, regional trade agreements, intra-industry trade, exchange rate volatility, trade in services, trade liberalization, direction of trade, balance of payments, trade creation and trade diversion, and outsourcing.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
