

Special Issue

International Trade, European Tourism and COVID-19

Message from the Guest Editor

This Special Issue focuses on the broad topic of “International trade, European tourism and COVID-19” and includes novel research on the use of computational methods and techniques for modelling, international trade and European tourism, as well as the incorporation of COVID-19.

Theoretical and empirical articles on the application of novel computational techniques in estimation, simulation, optimization, and calibration with applications to asset pricing, derivative valuation, hedging, and risk management are welcome. Contributions focusing on multivariate or high-dimensional applications in today's complex world, and novel measures of international trade, investment, European tourism, COVID-19 as well as international trade blocs, are encouraged.
