Internationalization of Emerging Market Multinational Enterprises in a Volatile Environment

Message from the Guest Editors

Emerging market multinational enterprises (EMNEs) have become important players in international business, and their internationalizations have contributed a significant amount of foreign direct investments (FDIs) to the global economy. However, the ongoing trade war between the world's two largest economies—the United States and China—has been challenging for EMNEs since 2018. The spread of COVID-19 has further impeded international business operations. It is critical for researchers to understand the impact of this volatile environment on the internationalizations of EMNEs. This Special Issue focuses on the broad topic of “Internationalization of Emerging Market Multinational Enterprises in a Volatile Environment” and aims to include novel research on EMNEs, FDIs, host country institutional risk, internationalization, risk management, risk tolerance, strategic configuration, and volatile environments.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief
