

## Special Issue

# Exploring Disruptive Technologies, Sustainability and Ethical Challenges in Accounting and Finance

### Message from the Guest Editor

This Special Issue aims to collect the latest thought-provoking research in the field of disruptive technologies, sustainability and business ethics as they relate to accounting and finance. Papers submitted for publication consideration may examine the risks and/or opportunities posed by disruptive/emerging technologies on various sustainability, corporate social responsibilities, business ethics, and accounting and financial management issues, using quantitative (archival, experimental, or survey) or qualitative methodology. All articles published should advance knowledge in accounting or finance, and are of interest to academics and/or practitioners. With the advent of global big data proliferation, this Special Issue welcomes papers that examine cultural and geographical diversity in studies related to both new and old technologies. Papers can investigate ways to better understand the risks and/or opportunities in technology uses that pervade human interactions, the corporate workplace, or the online marketplace, affecting accounting and/or financial management issues that have moral, social, and economic implications to supplier and/or industry relationships worldwide.

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
