Mechanisms and Models of Risk Management

Message from the Guest Editor

The world economy is in constant turbulent motion, and new threats and dangers are constantly emerging. For example, COVID 19 has led to the collapse of the world economy, the destruction of stock markets, mass unemployment, and socio-ecological threats to human existence in general. Existing risk management mechanisms and models are not able to cope with the emergence of threats at different hierarchical levels of the economy, from the global to the personal. In this regard, there is a need to identify ways to minimize the primary negative factors, especially economic factors, that may affect human activity. Only global implementation of a model of responsibility (as a set of economic, social, and environmental attributes) as a strategy for the development of society will determine risk management mechanisms.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief

Prof. Dr. Thanasis Stengos

Department of Economics and Finance, University of Guelph, Guelph,
