

## Special Issue

# Finance, Risk and Sustainable Development

### Message from the Guest Editor

Climate change and environmental deterioration pose a severe threat to the existence of human society.

Finance plays a crucial role in changing this situation and this fact incorporates risk. Since the turn of the previous century, the globe has confronted major environmental concerns, such as environmental degradation due to human activity coupled with energy consumption that creates dangerous emissions. The overall focus of this Special Issue is to provide an update analysis, from theoretical and empirical points of view, to improve and achieve sustainable development through the appropriate way in which to finance projects in order to reach the Sustainable Development Goals. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Finance, climate change, and sustainability.
- Risk and climate change.
- How sustainable finance can help to reach sustainable development.
- Effects of the adequate use of finance on the Sustainable Development Goals.
- CSR, finance, and the Sustainable Development Goals.

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
