Innovations Within Our Global Financial Economic System

Message from the Guest Editors

The financial economic system is dynamically evolving in response to globalization, new technologies, socioeconomic forces, governmental policies, investor expectations, and political uncertainties, to name but a few forces. As such, financial economics remains a vibrant area of research, especially given the rising importance of interdisciplinary approaches for identifying and solving relevant complex problems. Following the COVID-19 pandemic and the various supply chain disruptions we witnessed, the financial economic system is experiencing many challenges and uncertainties such as inflation, global trade imbalances and disputes between nations, rises in government debt, political tensions, and the proliferation of new digital technologies and bank lending mediums, to name but a few examples. To broaden our understanding of some of these important topics, this call for papers invites original research from an array of disciplines making novel theoretical and/or econometric contributions.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief

Prof. Dr. Thanasis Stengos

Department of Economics and Finance, University of Guelph, Guelph,
ON N1G2W1, Canada
