

## Special Issue

# Green Finance Risk Management under Peak Carbon Dioxide Emissions and Carbon Neutrality Goals

### Message from the Guest Editors

Green finance is in a period of rapid development, and the development status is not sufficiently mature. There is no mature experience to follow in the field of green finance supervision, and it is still necessary to deepen the research on green finance technology and strengthen the construction of cross-disciplines. In addition, the current international exchange of green finance is still mainly at the level of traditional green financial products and policy incentives. The exchange and cooperation of cases, technologies and products related to the application of financial technology is still very limited. The development and application of financial technology in China cannot be separated from the international whole. China's huge market and application potential should also provide a large space for international cooperation. We hope that through this Special Issue we can further clarify the possible risks in the implementation of the peak carbon dioxide emissions and carbon neutrality goals, and support the resolution of green financial risks with the help of data statistics and policy review.

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
