Special Issue

Policy Uncertainty and Empirical Finance

Message from the Guest Editors

This Special Issue focuses on policy uncertainty and empirical finance, seeking high-quality empirical research that advances our understanding of how policy uncertainty—whether global, national, or regional—affects financial outcomes. Economic and political developments frequently generate uncertainty in the policy environment, influencing financial markets and corporate decision-making in significant ways. We welcome empirical studies examining the impact of policy uncertainty on corporate finance decisions, financial intermediation, investor behavior, and market dynamics. Studies that explore heterogeneous effects across institutional environments, industries, regions, or other relevant dimensions are welcome. By bringing together diverse perspectives, this Special Issue aims to provide fresh insights into the mechanisms through which policy uncertainty shapes financial systems, offering valuable implications for policymakers, practitioners, and academics.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management* (*JRFM*), an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief

Prof. Dr. Thanasis Stengos

Department of Economics and Finance, University of Guelph, Guelph, ON N1G 2W1, Canada
