Advances in Systemic Risks Analysis

Message from the Guest Editor

This call for papers intends to gather works providing new perspectives and models on the topic of financial systemic risks, including interconnections with pandemic, climate, and disaster risks. The full range of systemic risks from sovereign, corporate, banking, and market to cybersecurity, climate finance risks, and their complex interconnections create new, unsolved challenges for research making in risk modelling, and for policy making in risk governance. We encourage submissions on a range of topics of relevance to the theme of systemic risks, including the theory and modelling of systemic risks; systemic risks interconnections; systemic risks and climate risks; systemic risks and extreme events (pandemic and disaster risks); and cybersecurity risks. All submissions must contain original unpublished work which is not under consideration for publication elsewhere.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
