

Special Issue

Technical Analysis in Financial Markets

Message from the Guest Editor

Technical Analysis is one of the most controversial topics in finance. Although at odds with weak form efficiency, it is very extensively used by practitioners and has been the subject of numerous academic studies. It is my pleasure to announce that I am editing a Special Issue of the Journal of Risk and Financial Management on Technical Analysis in Financial Markets. Both theoretical and empirical contributions are welcomed. Topics of interest include:

- The investigation of different markets such as currencies, equities, bonds, commodities and cryptocurrencies.
- Investigation of the ability of rules to predict markets and their consistency with the efficient markets theorem.
- Practical implications for investment management and asset allocation.
- Optimising existing rules and testing new rules.
- Using neural networks, agent-based modelling and machine learning to develop new rules.
- Investigating the causes of technical analysis.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief
