

## Special Issue

# Financial and Sustainability Reporting in a Digital Era

### Message from the Guest Editors

This Special Issue focuses on the broad topic "Financial and Sustainability Reporting in a Digital Era" and aims to encourage submissions building on interdisciplinary research in fields, such as accounting, business, economy, governmental policies, gender and diversity studies, artificial intelligence, national and international regulations/standards and digital transformation, or other studies that contribute to the development of sustainability and financial reporting in a digital era. We welcome papers based on a broad conceptualization of Financial and Sustainability Reporting, including, but not limited to, topics, such as new challenges for information actors, financial and non-financial reporting today and in the future and the risk relevance of international financial and sustainability reporting. We invite contributions of unpublished original research papers that promote the use of different methodological approaches (theoretical and empirical, both quantitative and qualitative).
