

## Special Issue

# Corporate Governance and Informational Risk

### Message from the Guest Editor

In today's dynamic and increasingly complex business environment, the quality of information disclosed by firms is more crucial than ever. Informational risk—the uncertainty or unreliability surrounding the information that stakeholders rely upon to make decisions—has become a central concern in corporate finance, accounting, and strategy. This Special Issue brings together new insights and empirical evidence at the intersection of corporate governance and informational risk, exploring how governance structures, practices, and mechanisms influence firms' transparency and the perceived credibility of their disclosures. Corporate governance plays a pivotal role in mitigating informational risk. Effective governance not only aligns the interests of managers and shareholders but also improves the monitoring and oversight of financial and non financial reporting and disclosure practices. In an era marked by heightened stakeholder scrutiny, regulatory evolution, and technological disruption, understanding the governance mechanisms that can reduce informational opacity is both theoretically relevant and practically urgent.

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
