

## Special Issue

# Sustainable Finance and Technological Innovation: Pathways to a Resilient Future

### Message from the Guest Editors

The goal of this Special Issue is to examine how innovative technologies—like blockchain, big data, fintech, and artificial intelligence—intersect with sustainable finance approaches that tackle social inequality, environmental degradation, and climate risk. The Issue aims to provide innovative models and tools that support a more sustainable and inclusive economic future by emphasizing how innovation can improve financial decision-making, transparency, and impact measurement. The Special Issue will provide a timely platform for knowledge advancement, policy formation, and responsible innovation guidance in the dynamic field of sustainable finance by tackling these and related issues. We welcome interdisciplinary perspectives on strategic management, operations management, international business, and organizational behavior.

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
