

Special Issue

The Econometrics of Energy Markets under Uncertainty

Message from the Guest Editors

Energy markets are characterized by dynamic and complex interactions influenced by factors such as geopolitical events, regulatory changes, technological advancements and environmental considerations. The inherent uncertainty in these markets poses challenges for market participants and policymakers. This Special Issue aims to employ advanced econometric methods to analyze and model the behavior of energy markets, taking into account the uncertainties that significantly impact decision-making processes. We welcome submissions on a broad range of topics related to the econometrics of energy markets under uncertainty.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
