

## Special Issue

# Attributes of Women Directors and Corporate Governance

### Message from the Guest Editor

Over the past two decades, policymakers worldwide have adopted numerous initiatives to promote corporate gender equity. This has inspired extensive research in accounting and finance, particularly regarding women's role in corporate boards. Despite the increasing number of studies discussing how board gender diversity affects firm-level outcomes, most studies only consider the presence or absence of women directors and the proportion of female directors on corporate boards. Most recently, the focus has shifted to attributes of women directors, such as their independence, committee membership, leadership, tenure, age, nationality/ethnicity, business education, other board membership, etc. These studies provide valuable insights into the effect of different attributes of women directors. However, more work is needed to examine whether women board members' attributes affect firm-level outcomes in different institutional settings, such as family dominance, relatively weaker country-level investor protection, mandatory gender quota, and COVID-19. This Special Issue aims to provide new insights into women board members' attributes at different firm-level outcomes.

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
