Analysis of Global Financial Markets

Message from the Guest Editor

The global financial system is highly complex, with cross-border interconnections and interdependencies. In this highly-interconnected environment, local financial shocks and events can be easily amplified and turned into global events. Understanding the individual characteristics of financial markets, as well as their similarities, interconnectedness, and interdependence is crucial to maintaining efficient and resilient financial markets, both on the micro and macro levels. Coupled with the growing availability of data and analytical tools, new insights can be gained on the functioning and characteristics of individual and interconnected markets, how they compare across a variety of metrics, and how they interact on the global level. Such metrics can include market quality, market efficiency, measures of market structure, and liquidity... (For further reading, please see: http://www.mdpi.com/journal/jrfm/special_issues/agfm)

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
