Corporate Finance and Governance I

Message from the Guest Editor

In the last 10 years, the empirical corporate finance and corporate governance research fields have embraced new methods and exploring test settings in order to establish causality—with great benefits for our scientific understanding—but often at the potential cost of the insights being limited to a specific situation. Thus, beyond using international data, this call for papers is also about encouraging research, which uses different methods or events—even if the inferences are the same. This will hopefully provide theorists with better insights about important variables to model... **Indexing & Abstracting Services:** Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), EconLit, RePEc, DOAJ and others. **Advantages:**

- Open Access
- Thorough peer review
- Fast manuscript handling time
