

## Special Issue

# Housing Market Bubbles, Credit and Crashes

### Message from the Guest Editor

In this Special Issue, we are open to research on housing market bubbles in general and research addressing the following questions in particular:

- What causes bubbles and crashes in the housing market?
- How can bubbles and crashes be avoided?
- What role plays credit in the housing market?
- Is excess mortgage debt related to housing bubbles and crashes?
- Are extreme house price movements different than price movements in other asset classes?
- Is the housing market more susceptible to bubbles and crashes than other markets?
- Is the availability and type of mortgage credit linked to extreme price movements in the housing market?
- What explains cross-country differences in the occurrence of housing bubbles and crashes?
- Does globalization (foreign capital) affect local housing markets?
- Does the evolution of housing as an asset class (financialization) increase the likelihood of house price bubbles?
- Do house price bubbles increase inequality?
- Are housing market bubbles more likely with fixed rate mortgage loans or with floating rate mortgage loans?
- Do ultra-low interest rates cause housing bubbles?

## About the Journal

### Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
