

Special Issue

Macroeconomics, Market Power, and Industrial Policy

Message from the Guest Editors

It is with pleasure that we announce the call for papers for the *Journal of Risk and Financial Management* Special Issue on Macroeconomics, Market Power, and Industrial Policy. This Special Issue will contain papers that study the macroeconomic implications of market power and industrial policy: the macroeconomic impact of private and public efforts to reshape markets. Both empirical and theoretical papers are welcome: the best papers will combine both empirics and theory. Of particular interest are papers on the impact of market power and/or industrial policy on macroeconomic risk or risk to the financial system, although papers on other relevant topics such as productivity and structural change are also welcome. Papers may be about the impact of market power and industrial policy on macroeconomic dynamics at any frequency, high (business cycle) or low (long-run levels of development, or growth trends). Case studies should explain why any findings can be reasonably generalized beyond the case in question. Industry studies should explain (and if possible quantitatively assess) the macroeconomic impact of any results.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
