

Special Issue

Risk Management in Economics and Finance in the Age of Digital Ecosystems Development

Message from the Guest Editor

This Special Issue focuses on the broad topic of risk management in the emerging and evolving digital economy. Digitalization is changing the usual financial and economic relationships. Digitalization brings new opportunities. At the same time, digitalization brings new risks. This problem is not well understood. New studies on risk modelling in the digital age, comprehensive analysis of digitalization, and the impact of digital risks on markets, digital risk management, digital security, etc., are welcome. Theoretical and empirical articles on the application of new methods in assessing, modeling, predicting the risks of the digital age, the development of specific risk management methods based on the use of digital technologies, digital hedging tools and risk management are welcome. Contributions devoted to the analysis of risks in the broad context of socio-economic and technological development, new measures of institutional protection of economic entities, and instruments of state development policy in the digital ecosystems age, etc., are encouraged.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief
