

Special Issue

Supply Chain Management

Message from the Guest Editors

Supply chain management has become a topic of very active research in operations managements over the last few decades. Presently, research needs to provide ways to complement traditional approaches in terms of robust alternatives for development and innovation delivery. The field has expanded, with important advances in management paradigms (e.g., LARG—Lean, Agile, Resilient and Green), digitalization (e.g., Internet of Things and Block Chains), business models for circular economy, sustainability and corporate responsibility, among others. The present Special Issue aims at collecting a number of new contributions, both at the theoretical level, as well as in terms of applications, to provide directions in which novel ideas might be applied in the context of supply chain management.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Editor-in-Chief
