

Special Issue

Sustainability Risks and the Future of Supply Chain Management

Message from the Guest Editor

This Special Issue is focused on how sustainability requirements will play an important role in the supply chain designs and models of the future. Non-conformance with sustainability will be a major supply chain risk of the future that will potentially disrupt supply chain operations. There are implications for supply chains to meet sustainability criteria, thus affecting and influencing procurement, international trade, legislation, supplier development, innovation, and operations. This paradigm will also affect the financial bottom line and costs. The Special Issue will accept both qualitative and quantitative methodologies, including theoretical, conceptual, empirical, and analytical methodologies.

About the Journal

Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.
