Deadline for manuscript submissions:

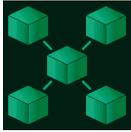

closed (30 November 2019)

Message from the Guest Editors

As massively distributed computing dominates the landscape, transformative technologies such as software-defined networking (SDN) and network functions virtualization (NFV) is playing a key role in the design of “next-generation” infrastructure. With the race to the fifth-generation mobile communications (5G) already underway, business and network operators are increasingly seeking to realize the opportunities to keep pace with business needs.

This Special Issue aims to provide a contribution by presenting cutting edge research advances and state-of-the-art knowledge on future networks and distributed systems ranging from theoretical analysis to case studies in the deployment of networking services/applications. This Special Issue particularly welcomes contributions on wireless, sensor, and actuator networks in the context of smart cities or intelligent critical infrastructure. Carefully selected contributions from the International Conference on Future Networks and Distributed Systems (ICFNDS) 2019 will be invited to submit extended versions of their papers to this Special Issue.

Journal of *Sensor and Actuator Networks*

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and many other databases.

Journal Rank: 2020 CiteScore - Q1 (*Instrumentation*)
