Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

JSAN is delighted to launch this call for papers for this Special Issue. We invite researchers to submit papers on a topic within the field of machine-environment interaction including related fields, which may include, but are not limited to, the following areas:

- Representation of the environment of an interactive system: models, formalisms
- The perception of the environment of interactive systems
- Data fusion and fission in interactive systems
- Techniques and methods for optimization and learning to facilitate interaction
- Reasoning in decision-making components of interactive systems
- System for evaluation and analysis of interactive systems
- Networks of sensors for interactive systems

This Special Issue includes selected papers from the Second EAI International Conference on Computational Intelligence and Communications (<https://cicom-conference.eai-conferences.org/2021/>). Authors of these papers are invited to submit an extended version of their paper for consideration.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank: CiteScore - Q1 (*Instrumentation*)
