Software Engineering, Shenzhen
University, Shenzhen 518060,
China

Deadline for manuscript
submissions:

closed (30 December 2022)

Message from the Guest Editor

Computer engineering programs were largely developed in engineering departments with a focus on electrical engineering. Today, the influence of computers has become more revolutionary than that of electrical engineering. The design, analysis, and operation of electrical and electronic systems are now dominated by computers, driven by a natural and convenient interface between computers and electrical systems, as well as significant improvements in speed and efficiency.

The aim of this Special Issue is to publish outstanding papers presenting the latest research and scientific results related to computer and electrical engineering topics.

This Special Issue will also contain selected papers from The 2022 15th International Conference on Computer and Electrical Engineering (ICCEE 2022). The conference will be held at and sponsored by Shenzhen University, China, on 24–26 June 2022 (<http://www.iccee.org/>).

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank: JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q1 (Control and Optimization)
