Deadline for manuscript
submissions:

closed (31 October 2017)

Message from the Guest Editors

In this Special Issue, we are seeking submissions that focus on implementing intelligent sensing infrastructure to solve the smart cities conundrum. Authors of selected outstanding papers in the International Conference of Future Networks and Distributed Systems will be invited to submit extended versions of their papers for consideration in this Special Issue.

Contributions may include, but are not limited to:

- Smart city architecture and infrastructure
- WSN and Internet of Things (IoT) architectures, protocols, platforms and algorithms
- Smart city technologies and applications
- Enabling wireless and mobile technologies for smart cities
- Intelligent sensors and actuators for homes, buildings and infrastructures
- Embedded sensing and actuating
- WSN for enabling technologies for precision healthcare
- Intelligent transportation systems and technologies
- Smart sewage and water
- Smart electricity, grids and meters
- Smart city community connectivity and solutions
- City environment monitoring and analysis

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and many other databases.

Journal Rank: CiteScore - Q1 (*Instrumentation*)
