

Special Issue

Internet of Things for Smart Agriculture

Message from the Guest Editors

The Internet of Things (IoT), which enables seamless communication between physical devices and the broad Internet, makes it possible to create automated monitoring and decision-making systems for smart agriculture to reduce resource consumption and to decrease production costs. Although IoT-based models are very promising for smart agriculture, many details surrounding their development still need to be addressed to create power-efficient, low-cost, secure, and widely deployable solutions.

This Special Issue aims to bring together scholars from academia and industry to discuss and present the most recent research and findings on the use of IoT for smart agriculture.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Editor-in-Chief

Prof. Dr. Lei Shu

1. College of Smart Agriculture (Artificial Intelligence), Nanjing Agricultural University, Nanjing 210031, China

2. School of Engineering, College of Science, University of Lincoln, Lincoln LN6 7TS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
