

Special Issue

AI-Assisted Machine-Environment Interaction

Message from the Guest Editors

The scope of this Special Issue encompasses a wide range of topics related to AI-Assisted Machine-Environment Interaction, including but not limited to:

- **Robotics and Autonomous Systems:**
 - Advanced algorithms for autonomous navigation and obstacle avoidance.
 - Human-robot interaction and collaboration.
- **Smart Cities and IoT:**
 - AI-driven solutions for smart infrastructure and urban planning.
 - Environmental monitoring and data analytics.
- **Industrial Automation:**
 - AI applications in manufacturing and process optimization.
 - Machine learning for quality control and inspection.
- **Agriculture and Environmental Science:**
 - Precision agriculture using AI and robotics.
 - AI-based environmental impact assessments.
- **Healthcare and Assistive Technologies:**
 - AI-powered assistive devices for improved patient care.
- **Intelligent Transportation and Logistics:**
 - AI in autonomous vehicles and intelligent transportation systems.
- **Natural Language Processing and Computer Vision:**
 - AI-driven user interfaces and interaction models.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Editor-in-Chief

Prof. Dr. Lei Shu

1. College of Smart Agriculture (Artificial Intelligence), Nanjing Agricultural University, Nanjing 210031, China

2. School of Engineering, College of Science, University of Lincoln, Lincoln LN6 7TS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
