

Special Issue

Journal of Sensor and Actuator Networks: 10th Year Anniversary

Message from the Guest Editors

Since its inception ten years ago, *JSAN*, the *Journal of Sensor and Actuator Networks*, has become a fixture among the current scientific journals. The topics covered by *JSAN*, sensor and actuator networks, are now more relevant than ever. Networked sensors and actuators form the backbone of the Internet of Things and many applications are based on them, such as smart cities, smart environment and Industry 4.0. As important data providers, they will become much more significant in the emerging AI ecosystems. We want to celebrate ten years of *JSAN* with this Special Issue. On the one hand, we want to look ahead, and therefore invite submissions of original papers. On the other hand, it is also worth looking back: which technologies have particularly influenced the field, and which form the basis of many applications today? For this purpose, we also invite submissions of review articles. Thematically, all submissions within the scope of the journal are welcome, e.g., system architecture, operating systems, and network hardware for sensor/actuator networks, smart and intelligent sensing and actuation, protocols and middleware for sensor/actuator networks.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Editor-in-Chief

Prof. Dr. Lei Shu

1. College of Smart Agriculture (Artificial Intelligence), Nanjing Agricultural University, Nanjing 210031, China

2. School of Engineering, College of Science, University of Lincoln, Lincoln LN6 7TS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
