

# Special Issue

## Optimization within Sensor Networks and Telecommunications

### Message from the Guest Editors

This Special Issue will focus on novel research directions in this challenging field. Topics of interest include, but are not limited to, distributed or centralized exact and heuristic approaches for the following problem areas: - sensor activation scheduling to prolong network lifetime; - sensor transmission scheduling to avoid collisions; - efficient tracking for moving targets; - sensor deployment for area monitoring; - mobility models and protocols for WSNs with mobile nodes; - efficient data transmission and multi-hop routing protocols; - failure-resistant robust protocols; - machine learning and pattern recognition applications to WSNs.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q1 (Control and Optimization)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
