Advanced Technologies for Smart Cities

Message from the Guest Editors

Smart cities have become the emerging innovation of governments, institutions, and companies. Smart city is a concept applied to our living environments that incorporates the Internet of Things and other information and communication technologies as digital strategy, where citizens can improve the quality of their daily life through the experience of transformation of their surrounding environment. It identifies technology-intensive cities which provide the ability to gather, analyze, transmit, and disseminate information so as to transform services offered to the citizens, increase operational efficiency, improve the environment, and involve better decisions at the municipal level. Authors of selected best papers presented in the International Symposium on Advanced Electrical and Communication Technologies ISAECT2020 (www.isaect.org) are solicited to submit an extended version of their works (at least by 50%) in all aspects of smart technologies and systems for smart cities applications. Submitted articles must not be currently considered elsewhere for publication.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Editor-in-Chief

Prof. Dr. Lei Shu

2. School of Engineering, College of Science, University of Lincoln, Lincoln LN6 7TS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
