

# Special Issue

## Privacy and Security of Networking

### Message from the Guest Editor

The proliferation the Internet-of-Things (IoT), mobile, and sensory devices, coupled with their pervasiveness worldwide, raises major conceptual and security concerns about the architectures that organize tomorrow's compute infrastructure, its scalability, and privacy and security requirements. Future novel architectures need to support the shift from edge devices consuming data to edge devices being a voluminous producer of data. This raises multiple questions concerning data placement, securing data, privacy, processing, and sharing. Edge computing is at the heart of such novel architectures, in which compute and storage resources are placed at the network edge, in proximity to mobile and IoT devices. In this Special Issue, we are seeking submissions that focus on secure data-centric edge architectures and privacy preserving data sharing frameworks that will enable compelling new applications and fully realize the opportunity of big data in tomorrow's mobile and IoT device environments. Information-centric networking (ICN) is a new network architecture that provides access to named data as a first order network service, providing better trust in data authenticity.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

---

### Editor-in-Chief

Prof. Dr. Lei Shu

1. College of Smart Agriculture (Artificial Intelligence), Nanjing Agricultural University, Nanjing 210031, China

2. School of Engineering, College of Science, University of Lincoln, Lincoln LN6 7TS, UK

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q1 (Control and Optimization)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
