

Special Issue

Massive Sensory Data Management in WSN, IoT and CPS

Message from the Guest Editor

Sensors and sensor networks are proliferating in many research domains such as the Internet of Things (IoT) and cyber-physical systems (CPS), and thus in many applications. Usually hundreds or thousands of sensor nodes are randomly deployed to collect environmental data from a region of interest. This makes WSNs one of the big data producers. Therefore, managing this huge amount of collected data is not an easy task, especially for sensors with limited energy and computational resources. This Special Issue aims to solicit recent research in big data management, from data acquisition to analysis, for WSN, IoT and CPS.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Editor-in-Chief

Prof. Dr. Lei Shu

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
