

Special Issue

Wireless Sensor Networks and Telecommunications

Message from the Guest Editors

The advent of massive Internet of Things (IoT) scenarios brought about by 5G mMTC and important trends such as Industry 4.0 pose several important challenges for a very broad range of vertical industries, such as agriculture, the manufacturing industry, transportation, PPDR, and smart cities. Wireless Sensors and Actuators will play a decisive role in the transformation of these industries. Aspects including communication technologies, efficient power usage and harvesting, processing capabilities, storage, and sensing and actuation technologies are of utmost relevance to the success of future IoT scenarios. Articles in this Special Issue should address wireless sensor networks in the context of telecommunication infrastructures. Potential topics include, but are not limited to:

- novel solutions and applications for mMTC scenarios;
- use-cases and proofs of concept (PoCs);
- new sensor and actuator architectures;
- advances in communications technologies (MAC, protocols, architectures);
- efficient energy usage and management of low power devices;
- security and privacy; and
- management of dense cells with constrained devices.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute research and comprehensive review articles for publication in Journal of Sensors and Actuator Networks (JSAN), an international, open access journal which provides an advanced forum for research findings in areas of sensors and actuators. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sensors and actuators and fostering applications of sensor-based measurements and effective actuator incorporation.

Editor-in-Chief

Prof. Dr. Lei Shu

2. School of Engineering, College of Science, University of Lincoln, Lincoln LN6 7TS, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
