Digital Resilience and Economic Intelligence in the Post-Pandemic Era

Message from the Guest Editors

In 2020, world leaders found themselves at historic crossroads, making decisions to face an unprecedented global problem, under remarkable pressures and diffused uncertainty. The pandemic posed daunting challenges to individuals and organisations. However, it opened windows of opportunities to reshape the economy recovery. While governments and international institutions are looking for solutions to support companies, workers and communities, need to identify new business models and even repositioning themselves in the new digital ecosystem. On the other hand, current global developments have shown, once more, that sustainability must remain the key driver of development in the transition towards sustainable consumption and production (SCP) based on all stakeholders engagement including governments, educators, the private sector and each and every consumer. This Special Issue is encouraging thinkers to provide their contribution to reshape the future, to look ahead at opportunities for sustainable innovation, change and growth, through digital technologies. We welcome conceptual, empirical and theoretical work in economics and social sciences.

About the Journal

Message from the Editor-in-Chief

Since its establishment, the *Journal of Theoretical and Applied Electronic Commerce Research (JTAER)* has been committed to publishing highquality, peer-reviewed scholarship that advances knowledge regarding electronic commerce in an increasingly complex and interconnected world. *JTAER* aims to create more innovative, responsible, and inclusive forms of electronic commerce by offering an open access international forum for both theoretical and applied research on the impact of digital technologies and business practices on markets and commerce. To achieve this mission, *JTAER* uses a rigorous peer-review process, adheres to strong ethical standards, and supports innovation and informed decision-making in the global digital economy.

Editor-in-Chief

Prof. Dr. Ting Chi
