Message from the Guest Editor

Dear Colleagues,

Research on cetaceans is of continued importance to help ensure the sustainability, health, and welfare of both wild and professionally managed populations. With the sustained increase in anthropogenic factors impacting wild cetaceans, determining strategies to help to conserve populations while monitoring their health and welfare is critical. Similarly, it is also essential to continuously look for new ways to enhance the health and welfare of cetaceans under professional care. The Special Issue is dedicated to research on cetaceans both in the wild and under professional care that advances our understanding of their conservation, health, and welfare. Examples of potential submissions include:

- Studies of population abundance, distribution, and behavior;
- Impact of anthropogenic factors and conservation management strategies;
- Statistical, technological, and methodological advancements;
- Validation and reference values for positive and negative indicators of health and welfare;
- Factors impacting health and welfare;
- Conservation education research and visitor studies;
- Review articles on conservation, health, or welfare.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Journal of Zoological and Botanical Gardens, an international, multidisciplinary, peer-reviewed, open-access and open-source scientific journal that covers areas at the intersection of fauna and flora conservation. It publishes reviews, original research papers, short communications and opinion papers, no restriction on the maximum length of the papers. The Journal of Zoological and Botanical Gardens is the first international, peer-reviewed journal that provides an advanced forum for studies on both animals and plants kept in zoos, aquaria, and botanical gardens. It offers a unique opportunity to have the most updated research insights into each individual institution and discipline, but also a chance to treat common issues relating to their missions and aims, responding to the need of a multidisciplinary partnership approach.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **ESCI (Web of Science)**, **Scopus**, **AGRIS**, and **other databases**.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.8 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
