From Entertainment to Conservation: Analysis of Zoos and Their Contribution to Human Societies

Message from the Guest Editor

Zoos have largely transitioned from places of entertainment to places of education and conservation, though this may not be the experience that visitors are seeking. Previous research has shown that visitors come to zoos for a variety of reasons, including to socialize, seek entertainment, receive education, and pursue connections with nature and animals. Recent research highlights that zoos are uniquely placed to provide up-close animal encounters and interactive experiences for visitors, which may contribute to the development of pro-conservation actions. Additionally, zoos can effectively educate visitors and advance the conservation and animal welfare movements; however, they must balance this with visitor enjoyment. The aim of this Special Issue is to explore the contribution that zoos make to society, e.g., promoting positive animal welfare, educating the public about conservation issues, and sponsoring research programs. Looking forward to your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Journal of Zoological and Botanical Gardens, an international, multidisciplinary, peer-reviewed, open-access and open-source scientific journal that covers areas at the intersection of fauna and flora conservation. It publishes reviews, original research papers, short communications and opinion papers, no restriction on the maximum length of the papers. The Journal of Zoological and Botanical Gardens is the first international, peer-reviewed journal that provides an advanced forum for studies on both animals and plants kept in zoos, aquaria, and botanical gardens. It offers a unique opportunity to have the most updated research insights into each individual institution and discipline, but also a chance to treat common issues relating to their missions and aims, responding to the need of a multidisciplinary partnership approach.

Editor-in-Chief

Prof. Dr. Kevin Cianfaglione

Faculté de Gestion, Economie et Science (FGES), Université Catholique de Lille, 59800 Lille, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, AGRIS, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 4.4 days (median values for papers published in this journal in the second half of 2025).
