Dialysis Access—A New Era

Message from the Guest Editors

Every year, the Japanese Society for Dialysis Access (JSDA) runs a conference to bring together doctors, clinical engineers, nurses, and medical companies relating to dialysis access. JSDA2020 was held in Osaka on 27th and 28th November during the ongoing COVID-19 pandemic, and the one-month online viewing period (on demand) ended on 15th January 2021. Because drug-coated balloon (DCB) will soon be available for vascular access in Japan, we have invited specialists to the international symposium (JSDA-KSDA joint symposium) from Korea where DCB is already used. Their experience will certainly be useful and helpful for doctors who will be using DCB in Japan, and all other countries considering an introduction to this new technique. The issue will comprise invited articles from selected presentations from our meeting, including the international symposium.

Guest Editors

About the Journal

Message from the Editor-in-Chief

In recent years, we have been witnessing dramatically increased interest in the treatment of chronic kidney disease, e.g., diabetic kidney disease, glomerular disease, or autosomal dominant polycystic kidney disease, but also aimed more generally on the progression of chronic kidney disease and the complications of chronic kidney disease, such as anemia, or hyperkalemia. This progress has led to changing paradigms as reflected by several recently published KDIGO guidelines which now need to be updated much more frequently than before. To personalize treatment, we also need better diagnostic methods, including validated biomarkers reflecting the activity of the disease (including response to treatment) and predicting outcomes.

Kidney and Dialysis aims to cover most of these areas not only in terms of feature reviews, but also original articles, and to keep the reader updated on recent progress in nephrology and dialysis.

Editor-in-Chief

Prof. Dr. Francesco Locatelli

Former Director, Department of Nephrology and Dialysis, Alessandro Manzoni Hospital, 23900 Lecco, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus and other databases.

Journal Rank:
