

Special Issue

Detection Techniques and Assay Development for Bacterial Susceptibility and Resistance

Message from the Guest Editor

In recent years, there has been growing interest in the development of rapid, high-sensitivity, and high throughput methodologies for applications in antimicrobial treatments, analysis and assessment of microbial growth and proliferation. This Special Issue of *Microorganisms* focuses on advances in detection techniques and assay development for monitoring susceptibility and resistance of bacterial strains to antimicrobial treatments. Topics include but are not limited to sensor technologies, emerging chemical/biochemical assays, and imaging techniques. You may choose our [Joint Special Issue](#) in *Microorganisms*.

Guest Editor

Dr. Pavel Ivanoff Reyes

Department of Electrical and Computer Engineering, Rutgers, The State University of New Jersey, Piscataway, NJ 08854, USA

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Weiyong Liu

Department of Laboratory Medicine, Tongji Hospital, Tongji Medical
College, Huazhong University of Science and Technology, Wuhan
430030, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

Rapid Publication:

first decisions in 19 days; acceptance to publication in 4
days (median values for MDPI journals in the first half of
2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names published annually in the journal.
