Message from the Guest Editors

We suggest the following thematic lines, although, of course, we invite authors to combine them or propose other topics:

- Impact of Social Media, Virtual Reality and the Metaverse in the places we inhabit
- Influence of the virtual in shaping the identity, history and perception of space
- Big data and spatial research: Implications on the meshing of qualitative and quantitative research methods
- Modeling softwares: Virtual assessments and their critiques
- New spatial imaginaries: Alternatives, experiments and explorations
- Landscape and heritage management: Physical and virtual historical layers
- New methods for urban management and professional practices
- Digital twins, deep mapping, and the virtual datafication of physical spaces: uses and impact
- User Generated Content (UGC) or online surveys and the social perception of space

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
