

## Big Data in Urban Land Use Planning

Guest Editors:

**Prof. Dr. Thomas W. Sanchez**

Department of Landscape  
Architecture and Urban Planning,  
Texas A&M University, College  
Station, TX 77840, USA

**Dr. Soheil Sabri**

Urban Digital Twin Lab, School of  
Modeling Simulation and  
Training, University of Central  
Florida, 3100 Technology  
Parkway, Orlando, FL 32826, USA

Deadline for manuscript  
submissions:

**15 December 2024**

### Message from the Guest Editors

Dear Colleagues,

With the development of urbanization and population growth, the problem of human–land conflict has become increasingly serious, and it is restricting the healthy and sustainable development of the urban landscape. Since the urban land use planning process is complex and involves social, economic, environmental, and political systems, knowledge of how these systems interact is the domain of professional planners. Artificial intelligence (AI) and big data technology can offer access to more information, while also helping to better integrate these systems.

For this Special Issue, research areas may include (but are not limited to) the following:

- Application of artificial intelligence (AI) and big data technology in urban land management;
- Urban land use and transportation;
- Multi-source heterogeneous spatiotemporal data fusion of urban land;
- Geographic big data mining;
- Urban land use change detection.
- Modeling and simulation of urban land use changes;
- Big data and multi-dimensional (above- and under-ground) urban land analysis.

We look forward to receiving your original research articles and reviews.

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Nature and Landscape Conservation)
